

Melody Lane, Pruitts Creek Road & Cold Spring Road Road Slip Remediation Elliott County, Kentucky

In 2011 Howerton Engineering & Surveying was contracted by Elliott to review three existing road slip sites within the county along Melody Lane, Pruitts Creek Road and Cold Spring Road. Elliott County had received a grant from FEMA to repair these slips; so all work was performed using FEMA standards.

The first phase of the project was perform a topographic of the property to better address the issues causing the slips and then to perform a right-of-way survey to determine the extents of the remediation.

The second phase was to prepare multiple options to the county to remediate the slips along with a cost analysis. The county and FEMA then reviewed the options to determine the best solutions for each site.

Client/Location

Elliott County
PO Box 710
Sandy Hook, KY 41171

Client Reference

David Blair
Elliott County Judge
Executive
