- Aerial Photography Overlay

Project Description

The purpose of this project was to establish the boundary line between the land of Greenbo Lake State Resort Park and the adjoiner's property. Due to a dispute over the boundary line, Howerton Engineering & Surveying was contracted to establish the boundary between Elza Hackworth, and the Greenbo Lake State Resort Park property. Extensive research and deed mapping was performed to be able to establish, with certainty, the proper location of the boundary.

Deliverables consisted of signed original bond print, CAD DWG, and PDF files of the survey.
