Project Description

Howerton Engineering & Surveying was contracted by RBI Solar to perform subsurface surveying on two proposed sites.

Site 1:

Gallia County School Southwestern ES
4834 State Route 325 South
Patriot, OH 45658

This site consisted of eight (8) rows of solar panels. Howerton Engineering & surveying performed Ground Penetrating Radar Surveying of over 1,500 linear feet to cover the extents of the solar panels. All subsurface items found were located, identified, surveyed, and placed on a site exhibit provided to the contractor displaying the items found and their depth.

Site 2:

Addaville
1333 Brick School Road
Gallipolis, OH 45631

This site consisted of six (6) rows of solar panels. Howerton Engineering & surveying performed Ground Penetrating Radar Surveying of over 1,700 linear feet to cover the extents of the solar panels. All subsurface items found were located, identified, surveyed, and placed on a site exhibit provided to the contractor displaying the items found and their depth.
